The seller certifies, by his/hers signature below, that the male dog meets SKK's registration rules at the time of the agreement and that correct information regarding the male dog has been given to the buyer. The seller also certifies that he/she has left essential information about known diseases/defects in the male dog as well as information about possible operations or other medical procedures/medications the dog underwent.

The buyer understands that he/she takes over the breeding rights to the semen/straws in connection with this agreement and that it is the owner of the bitch responsibility to check that the male dog meets the registration requirements when using the straws.

SIGNATURES			
The seller hereby assigns the right to use the frozen semen in accordance with the above conditions.			
Date	Place	Signature	Name clarification
The buyer certifies that the use of the frozen semen takes place in accordance with the above conditions.			
Date	Place	Signature	Name clarification

#### Clarifications regarding the rights according to this agreement, see below:

For frozen semen from a male dog that the seller holds with retained breeding rights or as a fosterer dog, the above agreement must not go beyond the rights the seller has agreed with the dog's buyer/fosterer. This means that the number of litters for the male dog must not exceed the number specified in the purchase agreement with retained breeding rights/fosterer agreement stipulations and that no inseminations may take place after ownership/breeding rights have passed to the buyer/fosterer.

Before making the sale, think carefully about the conditions for it based on your breed's population, the dog's previous offspring, etc.
